

## CSE468: Assignment 4

You are asked “as a section group” to extend the algorithm you created to apply a filter to an image in the last section, so that it can be used with any given image and any given filter (the filter size may be 3x3 5x5 7x7 ... etc).

You are required to deliver a compressed file named "Assignment4.zip" which contains:

1. The script you wrote in a file named "Assignment4.m".

The compressed file should be delivered using the indicated form in the course web page or using the following link:

<http://mct.asu.edu.eg/cse-468-submit.html>

Please note that bonus marks will be given to:

1. The 1<sup>st</sup> three students to deliver the full assignment.
2. The code with the fastest execution time.
3. Assignments with novel, creative solutions.

The deadline for receiving the assignment is Wednesday 08/04/2015 @11:59pm.
